SCOPE OF WORK:
IMPROVE EXISTING DRAINAGE SYSTEM AT ENTRANCE TO PARKING LOT
BY REPLACING AND REDESIGNING A 300SF OF EXISTING ASPHALT
Pavement and installing new catch basins and storm filter.

1. All work and materials shall be in accordance with the current edition of the AASHTO STANDARDS SPECIFICATIONS FOR HIGHWAYS, BRIDGES, CONSTRUCTION AND THE CITY OF BELLINGHAM DEVELOPMENT STANDARDS AND IMPROVEMENT STANDARDS.

2. Public Rights-of-Way shall be kept in a clean and presentable condition at all times. All debris shall be removed from rights-of-way prior to and during the construction. Public rights-of-way shall be kept clear of debris and construction materials.

3. The Contractor shall be responsible for keeping as-built information accurate and complete. The Contractor shall be responsible for providing the owner with all relevant as-built information upon completion of construction.

4. All work shall be performed in accordance with the approved plans and specifications. Any deviations from approved plans and specifications shall be in accordance with the owner's written approval.

(Unit to Scale)
NOTES:
1. An acceptable alternative to the tabular shown in the PRECAST BASE SECTION, shown in the Standard Specifications for Roadway, Bridge, and Canal Improvement, County Standards.
2. Bedding material for PVC pipe shall be Type II sand conforming to the following specifications:
   - Bedding material shall be a clean, natural sand having a water content not exceeding 10%, and conforming to the following gradation with the following composition:
   - U.S. Standard Sieve Size
   - Percent Passing, By Wt.
   - 5
   - 300
   - 0.3

BEDDING SPECIFICATIONS FOR PVC PIPE

THE FOLLOWING SPECIFICATIONS ARE TO BE USED IN CONSTRUCTION WITH THE STANDARD SPECIFICATIONS FOR ROADWAY, BRIDGE, AND CANAL IMPROVEMENT, COUNTY STANDARDS.

BORDERS FOR ROADWAY, BRIDGE, AND CANAL IMPROVEMENT FOR PVC PIPE:
- Bedding material for PVC pipe shall be Type II sand conforming to the following specifications:
- The inner border shall be a clean, natural sand having a water content not exceeding 10%, and conforming to the following gradation with the following composition:
- U.S. Standard Sieve Size
- Percent Passing, By Wt.
- 5
- 300
- 0.3
